DEVIKA N D

S T U D E N T – B.E (AI & ML)
devikashetty2716@gmail.com
LinkedIn: linkedin.com/in/devika2605 | **GitHub:** github.com/Devika2605

OBJECTIVE

AI & ML undergraduate focused on deep learning and applied machine learning, with experience in research projects, backend ML systems, and production-oriented pipelines. Seeking to contribute to real-world AI engineering teams and scalable data-driven systems.

KEY ACHIEVEMENTS

- **Runner UP** – National Level Hackathon, CIT College, Tumkur (April 2025) – Team Leader
- Developed and deployed **two official websites** for National Public School Shivamogga and departmental portal for AI & ML dept 2025.
- **Coordinated** a National-Level Technical Event (Techzone) and **volunteered** as a host for a State-Level Hackathon organized by IEEE at JNNCE.

EXPERIENCE

- **Web Master at ACM JNN Student chapter – and built a Department portal Website**
  {currently being used by the department}
  Designed, developed, and deployed official web portals using HTML, CSS, JavaScript, and PHP
- Completed **Four AICTE** Approved internship with Shell India , IBM , Vault of Codes, Vodafone in Cloud Computing, Machine Learning, Prompt engineering, LLMs and completed **Pragati coherent 6**.
- **Ai intern – DScirbe -** working on backend support for real-time streaming of AI-generated discharge summaries.

PROJECTS

➢ **EpigenEase™** – AI-Powered Epigenetic Health Forecasting | *May 2025*
Team Leader

- Built a deep learning tool for disease prediction and diagnosis with nearest doctor suggestions.
- Integrated **SwasthyaBot**, a multilingual chatbot for patient interaction and health suggestions.
- Included Kannada and Hindi language support, offline access (PWA), and dynamic UI/UX design.

➢ **School Web with Admin Panel Suite** | *March–May 2025*

- Already published and currently being used by the **National Public School - Shivamogga**
- Created backend interface to manage uploads (YouTube/local), PDF magazines, and SQL-powered content.
- Built custom interfaces using PHP, Bootstrap, and JSON for dynamic content updates.

➢ **Weed and Crop Detection Using YOLOv5** | *June 2025*

- Engineered an AI-powered object detection model using **YOLOv5** to accurately classify crops and weeds from custom-labeled images.
- Simulated smart pesticide spraying ,animated visual outputs, targeting only weeds to promote sustainable farming.
- Augmented and trained on 1300+ field images, leveraging OpenCV, Keras, and Google Colab for efficient, real-time inference.

➢ **Medical Image Segmentation & Analysis using MONAI** | *Nov 2025*
AI / Deep Learning Research Project
Developed deep learning pipelines for **medical image segmentation** using **MONAI** and **PyTorch**.

- Implemented preprocessing, training, validation, and inference workflows for healthcare imaging data (MRI/X-ray) and Integrated Grad-CAM / attention-based visualizations to interpret model predictions.
- Focused on research-grade experimentation, reproducibility, and performance evaluation.

EDUCATION

Jawaharlal Nehru New College of Engineering
B.E - AIML
2023-27 (Grade – 9.38)

DVS Composite PU College
XII class
2021-23 (Grade – 9.4)

SKILLS

Languages: Python , C, Java(basic).
Web: HTML, CSS, Bootstrap, React.
Backend: Django, Node.js, Express, MySQL.
AI/ML: TensorFlow, PyTorch, Pandas, NumPy.
Soft Skills: Strong understanding of AI concepts, analytical thinking, and problem-solving skills.
Tools: Git, VS Code, Google Colab.

LANGUAGES

- English [Fluent]
- Hindi [Fluent]
- Kannada [Native]

HOBBIES

- Reading and Painting
- Traveling
- Table Tennis

DECLARATION : I, Devika N D, hereby declare that the information provided above is true to the best of my knowledge and belief.
